English

to develop a student's love of literature through widespread reading for enjoyment. Students will get to read Shakespeare, romantic poetry, the great novels of the nineteenth century together with seminal works of world literature. Exposure to the great works of literature it is hoped will give students an appreciation of our rich and varied literary heritage.

Department for Education

Draft National Curriculum Programmes of Study

Science

by building on fundamental ideas and concepts the curriculum aims to foster in students an excitement and curiosity of natural phenomenon. Students will study the fundamental mechanics of the cell, learn about stem cells, photosynthesis and genomics; they will be exposed to radiation (in a theoretical sense) and the evidence for the Big Bang.

Mathematics

Mathematics is a creative and highly inter-connected discipline that has been developed over centuries, providing the solution to some of history's most intriguing problems. A high-quality mathematics education therefore provides a foundation for understanding the world, the ability to reason mathematically, and a sense of enjoyment and curiosity about the subject.

The Atoms of Arithmetic

105

A cluster of orange spheres, resembling atoms, arranged in a roughly circular pattern. The number 105 is prominently displayed in the center of the cluster in a large, white, sans-serif font. The background is a warm, orange-to-red gradient with faint, repeating patterns of numbers and mathematical symbols.

The Periodic Table

Euclid

(ca. 350-300 B.C.)

Proposition 20 of Euclid's Elements

There are infinitely many prime numbers.

Proposition 20 of Euclid's Elements

There are infinitely many prime numbers.

Suppose you thought that

2,3,5,7,11,13,17,19,23,29,31,37,41,43

were the only primes.

Proposition 20 of Euclid's Elements

There are infinitely many prime numbers.

Suppose you thought that

2,3,5,7,11,13,17,19,23,29,31,37,41,43

were the only primes.

Euclid's Number: $2 \times 3 \times 5 \times \dots \times 37 \times 41 \times 43 + 1$

Proposition 20 of Euclid's Elements

There are infinitely many prime numbers.

Suppose you thought that

2,3,5,7,11,13,17,19,23,29,31,37,41,43

were the only primes.

Euclid's Number: $2 \times 3 \times 5 \times \dots \times 37 \times 41 \times 43 + 1$

Euclid's number is not divisible by any of the primes on your list.

Hence you must have missed some primes.

Record Breaking Primes

$$2^{57,885,161} - 1$$

*In 2013 a new record was set by the
Great Internet Mersenne Prime Search*

This prime has over 17 million digits.

www.mersenne.org

Prime Number Cicadas

The *Magicicada septendecim* hide in the ground for 17 years then emerge for a six week party. They sing loudly, mate, eat, lay eggs then die. The forest goes quiet for another 17 years.

Cicada = 9 years

Predator = 6 years

1 2 3 4 5 7 8 10
 11 13 14 15 16 17 19 20
 21 22 23 25 26 28 29
 31 32 33 34 35 37 38 39 40
 41 43 44 46 47 49 50
 51 52 53 55 56 57 58 59
 61 62 64 65 67 68 69 70

 91 92 93 94 95 97 98 100

Cicada = 7 years

Predator = 6 years

Olivier Messiaen: composer and mathematician

The image displays a page of musical notation for the piano accompaniment of 'Quartet for the End of Time' by Olivier Messiaen. The score is written for piano (Pn.) and consists of four systems of music. The first system includes the tempo and dynamic markings *pp legato*. The notation is in 3/4 time and features complex rhythmic patterns and chordal textures characteristic of Messiaen's style. The background of the slide is a decorative orange and yellow pattern with purple and blue accents.

Quartet for the End of Time

Liturgie de Cristal: uses primes 17 and 29

The image displays a page of musical notation for the piano accompaniment of 'Quartet for the End of Time' by Olivier Messiaen. The score is written for piano (Pn.) and consists of four systems of staves. The first system includes the dynamic marking *pp legato*. The music is in a 3/4 time signature and a key signature of two flats (B-flat major or D-flat minor). A vertical red line is drawn through the second system of staves, marking a specific point in the music.

Quartet for the End of Time

Liturgie de Cristal: uses primes 17 and 29

The image displays a page of musical notation for the piano accompaniment of 'Quartet for the End of Time' by Olivier Messiaen. The score is written for piano (Pn.) and consists of four systems of staves. The first system includes the dynamic marking *pp legato*. The notation is in 3/4 time and features complex rhythmic patterns and chordal textures. Two vertical red lines are drawn on the score, one in the third system and one in the fourth system, marking specific measures.

Code cracking:
Find two primes p and q so that
 $126,619 = p \times q$

Prime numbers are literally the key to making and breaking RSA,
the cryptographic code that powers internet commerce

"A mathematician, like a painter or poet,
is a maker of patterns... I am interested
in mathematics only
as a creative art."

From Terry Pratchett's *Thief of Time*.

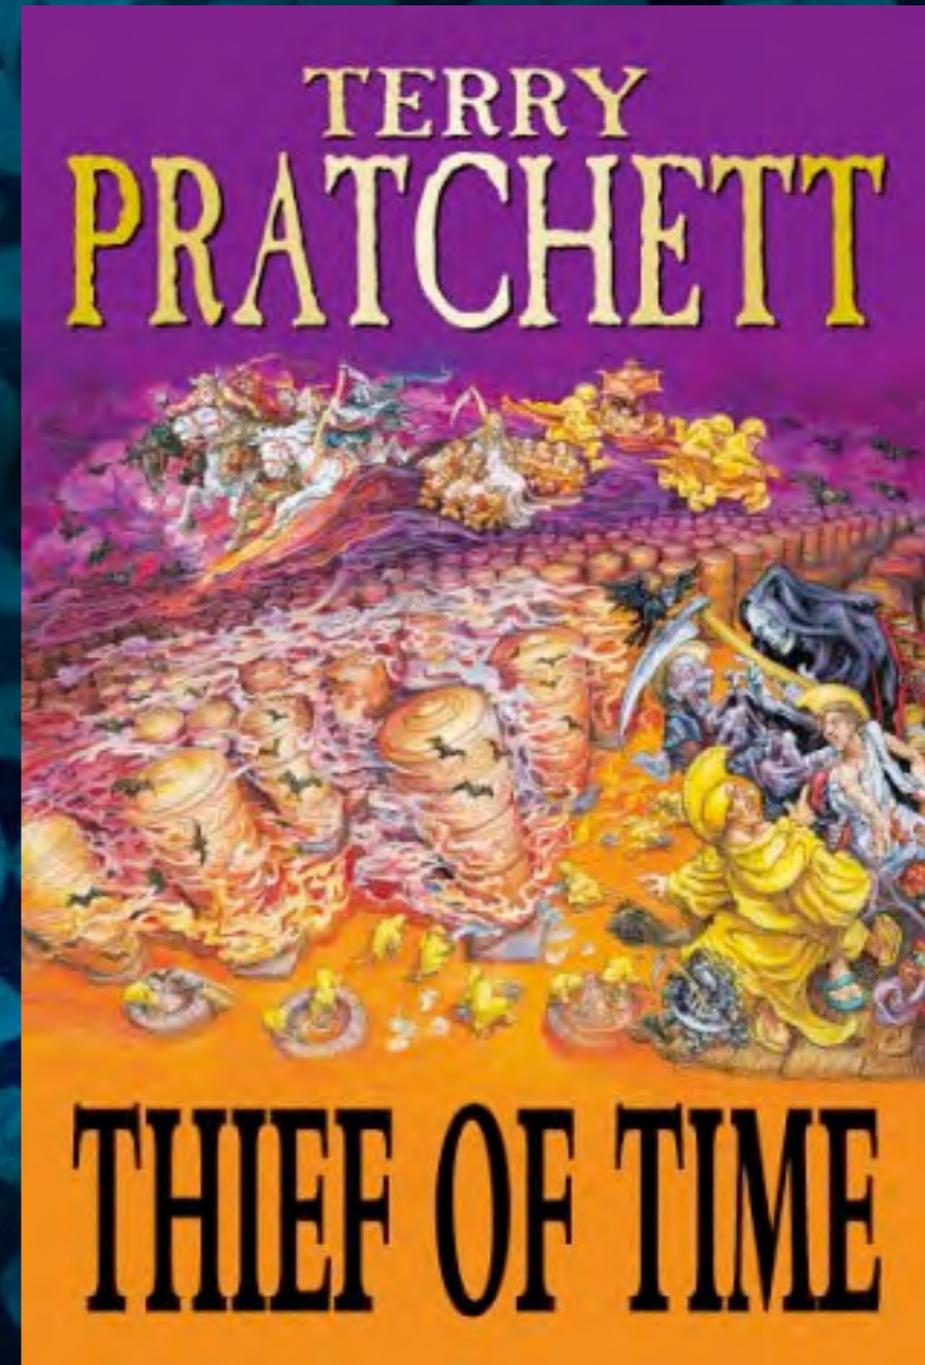

Susan is a teacher talking to her Head teacher:

"What precisely was it that you wanted madam?" she said. "It's just that I have left the class doing algebra and they get restless when they've finished".

"Algebra?" said Madam Froot.

"But that's far too difficult for seven-year-olds!"

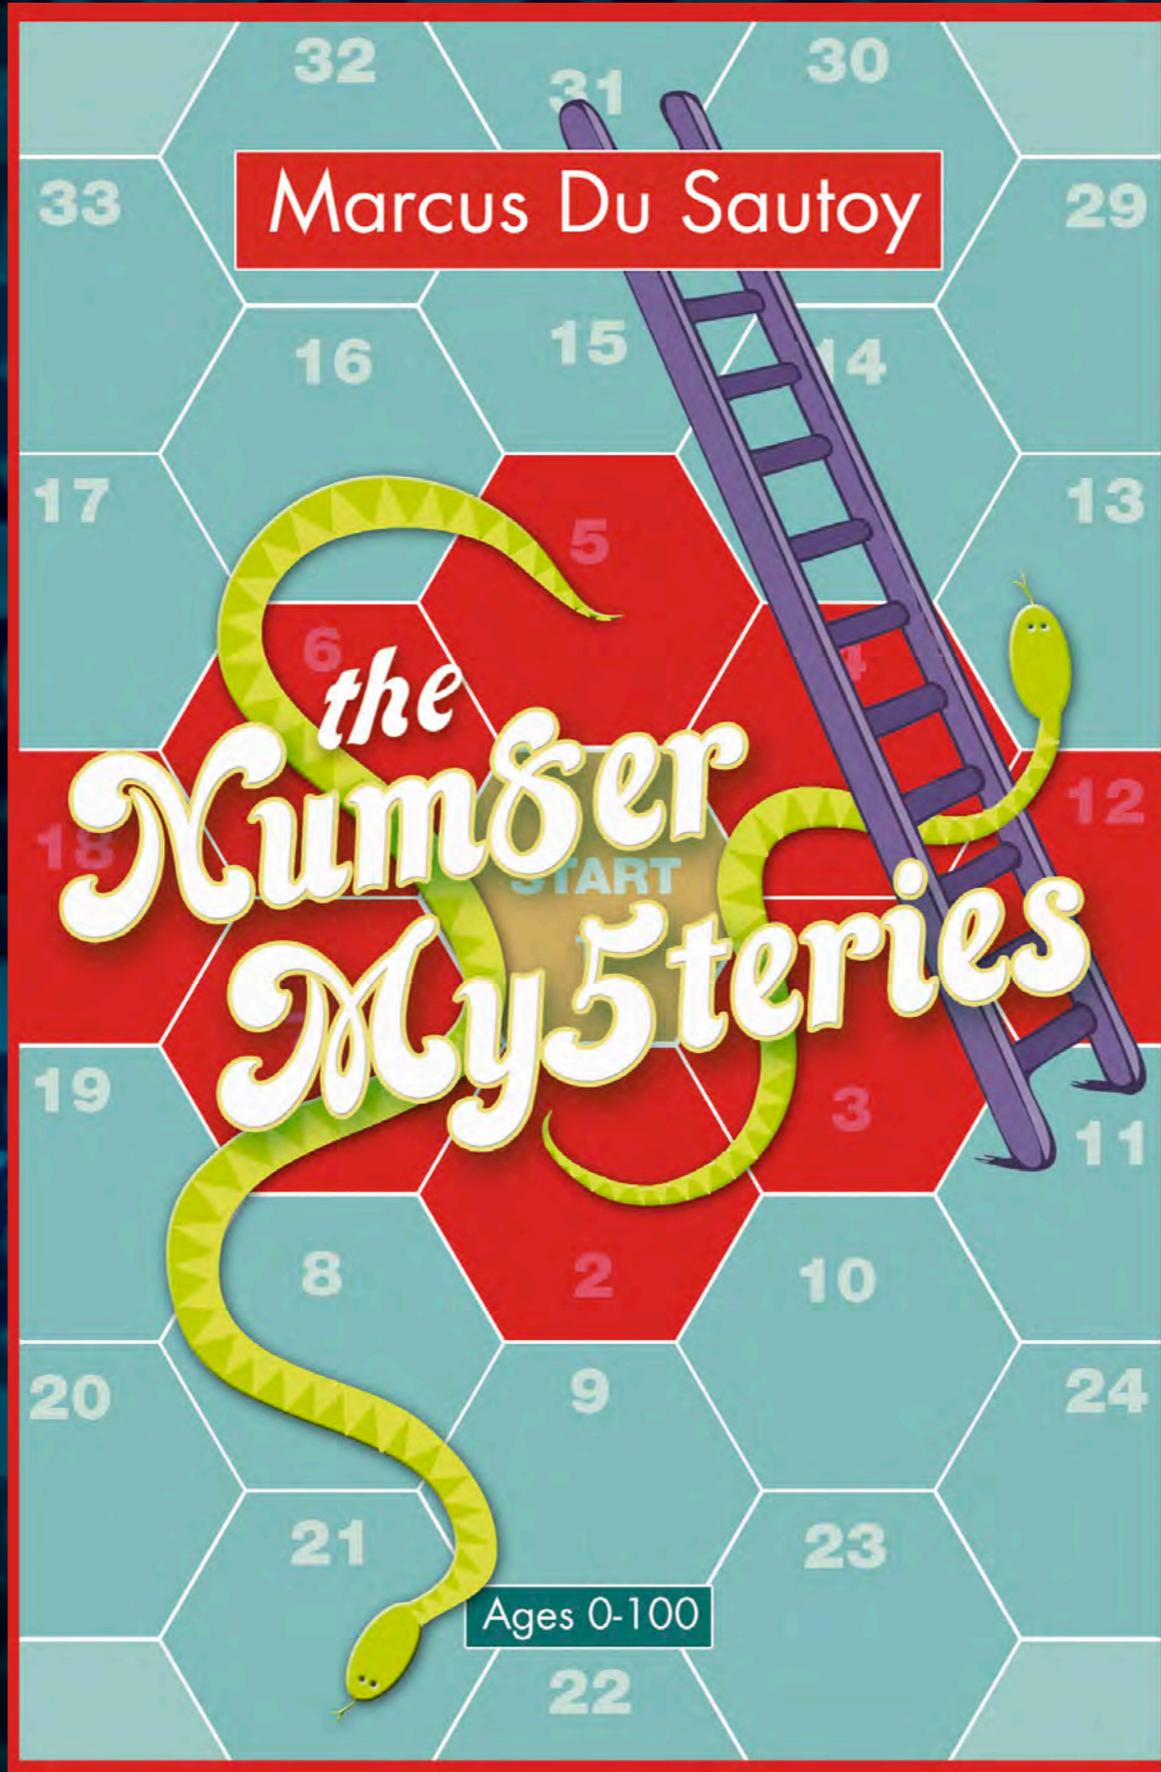

"Yes but I didn't tell them that, and so far they haven't found out" said Susan.
