**Background: What needs have you identified and hope to address by the project? (link to themes and content of conference)**

We have noticed that there is a boundary that separates us with people in other states and countries. And limits our knowledge of the world around us.

**Mission & Objectives: What do you want to achieve?**

Breaking down the boundaries between culture. And open discussion around the world about culture and current issues. Awareness and connectivity among people in the world to promote harmony among cultures.

**Activities (objectives): How the project will achieve your goals**

To open dialogue among cultural topics and allow a place to share and deepen our worldly knowledge. We will make videos about specific cultural demonstrations and current issues in each of our countries. The videos will have subtitles in many languages to allow for diversity among the viewers. We will later add a day in our lives among each of our respective cities. And to have room for viewers to ask question to open discussion. And to allow an enrichment in new cultural endeavours.

**Collaborators: What groups are important in the development and implementation of the project? (within the organization)**

We need the members of our group to collaborate in all aspects of the projects. (Videos, editing, etc.) we would also need the teachers, especially TOK teachers, to help promote and/or share. It would also be helpful or even a bonus if we can get kids from around the world to help us out and send us videos.

**Partners: What groups or organizations are crucial to the development of the project? What are their roles? (outside the organization)**

We do not have specific need of major corporations. It would be helpful to share our ideas with similar intellectuals and/or activists to help share our ideas and get the word out on what we are doing.

**Timeline: What sort of timeline have you developed?**

- August-September: reach out to students in our corresponding schools to join if they would like to help out and help make videos.
- September-October: upload our first video and continue uploading on a weekly basis.
- November-December: Gain viewers and promote the organization more.
- January: Make a video of someone’s hometown.

<tr>
<th><strong>Budget/Resources: What funds and materials are needed?</strong></th>
<th><strong>Communication: How would you use social media or other approaches to communicate your project?</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>No funds are needed and the materials are own computer, camera, and a editing service.</td>
<td>Social media will be our main platform and using multiple sites to spread the information to other people and to share the topics.</td>
</tr>
</tbody>
</table>

**Evaluation: How you will measure success? What challenges would you have to overcome as a result of implementing this in the real world?**

We will measure success by the amount of views and comments that happen on our social media pages. The challenges would be getting the word out there to people and keeping up with making videos and managing all the social media pages.
